Safe 10 Small Safe

Safe 10: Protect what belongs to you. When security marries technology.

Safe made of steel with a resistant gray paint, it is the ideal solution for boat owners who want to ensure maximum safety for their goods or small devices. The safe stands out for its design, the control panel integrated flush with the door and three independent locking systems (numerical code, mechanical and electronic key), which offer total and customizable protection. It is designed for those seeking safety and practicality without compromising on design.
